

EKAMANT

EKA 3001 N

EKA 3001 N IS DESIGNED FOR THOSE APPLICATIONS WHERE SURFACE QUALITY is crucial and more important than high stock removal rates. The silicon carbide grit in combination with a pliable E-weight paper contributes to an efficient lacquer sanding operation with fine scratch pattern.

EKA 3001 N is further treated with a new improved stearate coating which effectively reduces clogging problems and contributes to an improved surface finish.

The Antistatex® bonding system provides a fully antistatic effect which reduces clogging of the product and minimizes dust load on the sanding surface.
